Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayes, Jr. et al (hereinafter Hayes), US Patent 6,339,826.

As per claims 1 and 4, Hayes discloses protecting files distributed over a network (see for example; applets, abstract) comprising:

displaying a site map of folders and files in a server computer file system (see for example; fig 4 and col 21 ln 33-40);

generating protection status information (permit user access) in response to selection by a user of at least one of the files in the site map (see for example; col 21 ln 36-40); and

Sending the protection status information to a server computer (see for example; col 7 ln 65-col 8 ln 5; server uses such information and thus needs the status information to be sent).

As per claims 2 and 5, Hayes discloses the claimed limitations as described above (see claim 1) and further discloses displaying the site map

together with a corresponding status for each file in the site map (see for example; figs 24 and col 21 ln 33-45), and wherein the method further comprises the step of modifying protection status of at least one of the files (see for example; col 21 ln 36-40), and wherein said sending sends modified protection status information to the server computer (see for example; ; col 7 ln 65-col 8 ln 5; server uses such information and thus needs the status information to be sent).

As per claims 3 and 6, Hayes discloses the claimed limitations as described above (see claim 1) and further discloses recording protection status information in a protection status database (see for example; Database 212 fig 2 and col 9 ln 6-12).

3. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Montague et al (hereinafter Montague), US Patent 5,761,669.

As per claims 1 and 4, Montague discloses protecting files distributed over a network (see for example; entities, abstract) comprising:

Displaying a site map of folders and files in a server computer file system (see for example; fig 3 and col 8 ln 34-40);

Generating protection status information (access control lists) in response to selection by a user of at least one of the files in the site map (see for example; col 8 ln 38-55); and

Sending the protection status information to a server computer (see for example; col 9 ln 23-45).

As per claims 2 and 5, Montague discloses the claimed limitations as described above (see claim 1) and further discloses displaying the site map together with a corresponding status for each file in the site map (see for example; figs 5-6), and wherein the method further comprises the step of modifying protection status of at least one of the files (see for example; col 3 ln 26-35 and change access to an entity, col 3 ln 60-65), and wherein said sending sends modified protection status information to the server computer (see for example; col 14 ln 3-18).

As per claims 3 and 6, Montague discloses the claimed limitations as described above (see claim 1) and further discloses recording protection status information in a protection status database (see for example; col 14 ln 54-57).

Response to Arguments

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
